

Consultant Clinical Neuropsychologist / Clinical Psychologist in Neuropsychology

JOB DESCRIPTION

Location: Clinician home and surrounding areas (Hybrid/Remote)

Job Type: Full-time or Part-time (minimum of 3 days per week) (PAYE)

Salary: Competitive, based on experience, starting salary £90,000

Website: www.psychologia.co.uk

Overview

Psychologia is a specialist provider of neuropsychological services across the South of England. We are a small, friendly, and highly skilled team of Clinical Psychologists and Neuropsychologists dedicated to delivering high-quality, community-based neuropsychological assessment and rehabilitation.

We work with individuals affected by acquired brain injuries and related neurological conditions, including traumatic brain injury (TBI), stroke, functional neurological disorder (FND), and epilepsy.

Our work is collaborative, often integrated within bespoke multidisciplinary rehabilitation teams, supporting clients in their recovery and reintegration into everyday life.

We are now seeking to recruit a Consultant Clinical Neuropsychologist/Clinical Psychologist in Neuropsychology.

This Role is Ideal for:

We are seeking a Consultant-level clinician to provide expert clinical leadership within the organisation. This role is designed for an established expert who wishes to remain clinically active while leading specific service pathways (e.g., FND, TBI, or Medico-legal) and shaping the clinical standards of the practice.

We warmly welcome expressions of interest from:

- **Current Band 8B/C Clinicians** looking for a high-autonomy role with the ability to influence service design.
- **Established Consultants** who wish to transition into a specialist independent practice focused on excellence in community rehabilitation.

Key Responsibilities

This is a predominantly clinical role, and Consultants are expected to maintain a substantial and active caseload, contributing significantly to direct service delivery. Consultant clinicians are distinguished by their high level of autonomy, ability to manage highly complex cases independently, and contribution to high-level clinical decision-making.

- Provide neuropsychological consultation for complex clinical cases.
- Offer senior clinical supervision and mentorship to junior psychologists.
- Ensure evidence-based practice and innovation across the team.
- Support the service in matters of clinical governance and quality assurance.
- Produce high-level reports for clients and families, MDT and legal stakeholders.
- Work independently and collaboratively within multidisciplinary teams
- There are opportunities to contribute to clinical leadership, service development, and pathway design, depending on experience and interest

What We Offer

- Flexible working
- Hybrid model with remote, home-based, community, and clinic-based work

Generous Benefits:

- Private medical insurance
- Paid travel time and full mileage reimbursement
- 30 days annual leave plus bank holidays (pro rata) and additional leave over the Christmas period
- Enhanced maternity leave
- NEST pension

Professional Development:

- Regular clinical supervision and access to ad-hoc clinical supervision on a day-to-day basis
- Support and study leave for PGDip in Clinical Neuropsychology and/or QiCN
- Opportunities to present at conferences and contribute to teaching

Career Progression:

- Clear pathways for advancement including annual appraisal
- Supportive environment for those stepping into Consultant-level roles

Location & Travel

This role is based remotely, with travel to client homes, communities, or local clinics as needed.

Travel time is included in your working hours, and all travel expenses are reimbursed.

About You

This role is well suited to clinicians who enjoy a high degree of clinical autonomy and maintaining a strong, active caseload within a flexible, community-based model. We're looking for someone who is:

- HCPC-registered as a Clinical Psychologist
- Experienced in neuropsychological assessment and rehabilitation
- Skilled in working with clients with acquired brain injuries and related conditions
- Passionate about innovation, collaboration, and client-centred care

How to Apply

We invite informal expressions of interest and are happy to discuss the role informally.

We would also welcome your CV and a formal expression of interest via email.

Please contact our Clinical Director at Enquiries@Psychologia.co.uk
